

## **INDEX**

<b><u>S. NO.</u></b>	<b><u>EXPERIMENT</u></b>	<b><u>DATE OF EXP.</u></b>	<b><u>SIGNATURE</u></b>
1.	Introduction to Wireless LAN, Simulator and Digital Communication Trainer System	25/08/2020	
2.	Build a Computer-to-Computer, Peer-to-Peer, Network (Ad-Hoc Wi-Fi Network)	01/09/2020	
3.	Build Infrastructure Mode in Wireless Networking	08/09/2020	
4.	Configure Access Point with Point to Point	15/09/2020	
5.	Configuring Access Point with Point to Multi Point	06/10/2020	
6.	Introduction to Cisco Packet Tracer	20/10/2020	
7.	Configure IP Address in following Topology: Mesh Topology, Star Topology, Ring Topology, Bus Topology	27/10/2020	
8.	Configure IP Address between two networks by using a Router and two PCs	10/11/2020	
9.	Configure IP Address between two networks by using 2 Routers, 2 Switches and number of PCs	15/11/2020	
10.	To Configure Access Points	24/11/2020	
11.	Study of BPSK Modulation and Demodulation Process	27/11/2020	
12.	Study of Pulse Width Modulation and Demodulation	01/12/2020
